

GATE 2027 CSE DEDICATED BLUEPRINT

Complete 8-Month Subject Planner, Syllabus Checklist & 3x Revision Tracker

TARGET: AIR < 100 // OBJECTIVE: MAXIMUM MARKS EXTRACTION

1. RECOMMENDED DAILY STUDY BLOCK PARTITION

PHASE 1: CONCEPT EXTRACTION 2.5 Hours focused on technical core video lectures, deep textbook alignment, and clean standard note building.	PHASE 2: ACTIVE SOLVING 1.0 Hour strict testing routine. Solve a baseline minimum of $N \geq 15$ topic-wise Previous Year Questions (PYQs) immediately.	PHASE 3: PERIODIC CACHE REVIEW 30 Minutes processing short notes and formula matrices to prevent memory decay of previously learned subjects.
---	---	--

2. COMPLETE SUBJECT CHECKLIST & 3X REVISION MATRIX

Track your preparation progress systematically. Check off each box only upon thorough validation of the corresponding benchmark.

TIMELINE	GATE CSE SUBJECT VECTOR	WEIGHTAGE	SYLLABUS	PYQS	REV 1	REV 2	REV 3
June – July	Discrete Mathematics Combinatorics, Graph Theory, Mathematical Logic, Set Theory & Algebra	7–9 Marks	☐	☐	☐	☐	☐
June – July	Digital Logic Boolean Algebra, Logic Gates, Minimization, Sequential & Combinational Circuits	4–5 Marks	☐	☐	☐	☐	☐
August	C Programming & Data Structures Arrays, Pointers, Structures, Recursion, Stacks, Queues, Linked Lists, Trees, Hashing	5–7 Marks	☐	☐	☐	☐	☐
August	Algorithms Asymptotic Analysis, Sorting, Searching, Divide & Conquer, Greedy, DP, Graph Traversals	5–7 Marks	☐	☐	☐	☐	☐
September	Theory of Computation (TOC) Regular Languages, Finite Automata, Context-Free Languages, PDA, Turing Machines	5–6 Marks	☐	☐	☐	☐	☐

TIMELINE	GATE CSE SUBJECT VECTOR	WEIGHTAGE	SYLLABUS	PYQS	REV 1	REV 2	REV 3
September	Compiler Design Lexical Analysis, Parsing, Syntax-Directed Translation, Intermediate Code, Code Optimization	4–5 Marks	☐	☐	☐	☐	☐
October	Operating Systems System Calls, Processes, Threads, CPU Scheduling, Deadlocks, Memory Management, File Systems	6–8 Marks	☐	☐	☐	☐	☐
October	Database Management Systems ER Model, Relational Model, Relational Algebra, SQL, Normalization, Transactions & Concurrency	5–7 Marks	☐	☐	☐	☐	☐
Nov – Dec	Computer Networks Concept of Layering, Data Link, Network (IPv4/IPv6, Routing), Transport (TCP/UDP), Application Protocols	6–8 Marks	☐	☐	☐	☐	☐
Nov – Dec	Computer Organization & Architecture Machine Instructions, Addressing Modes, ALU, Data Path, Pipelining, Memory Hierarchy, I/O Interface	5–7 Marks	☐	☐	☐	☐	☐
Continuous	Engineering Mathematics & Linear Algebra Matrix Algebra, Systems of Linear Equations, Eigenvalues, Calculus, Probability & Statistics	13 Marks	☐	☐	☐	☐	☐
Continuous	General Aptitude Quantitative Aptitude, Analytical Reasoning, Verbal Ability, Spatial Reasoning	15 Marks	☐	☐	☐	☐	☐

 **MANDATORY TESTING VECTOR: OCTOBER 15 PIVOT**

On **October 15**, lock your primary focus into **Full-Length Mock Tests (FLT)**s. Do not delay tests waiting for a 100% syllabus finish. Use the errors mapped out in your mock analytics to drive targeted revision of weak segments during the week.
